

Tener una aplicación con AngularJS y se requiere tener multiples vistas con multiples htmls, aquí una POC. Para esto se utiliza ui-router (<https://github.com/angular-ui/ui-router>)

Vista 1

tipo 1

Vista 2

tipo 2

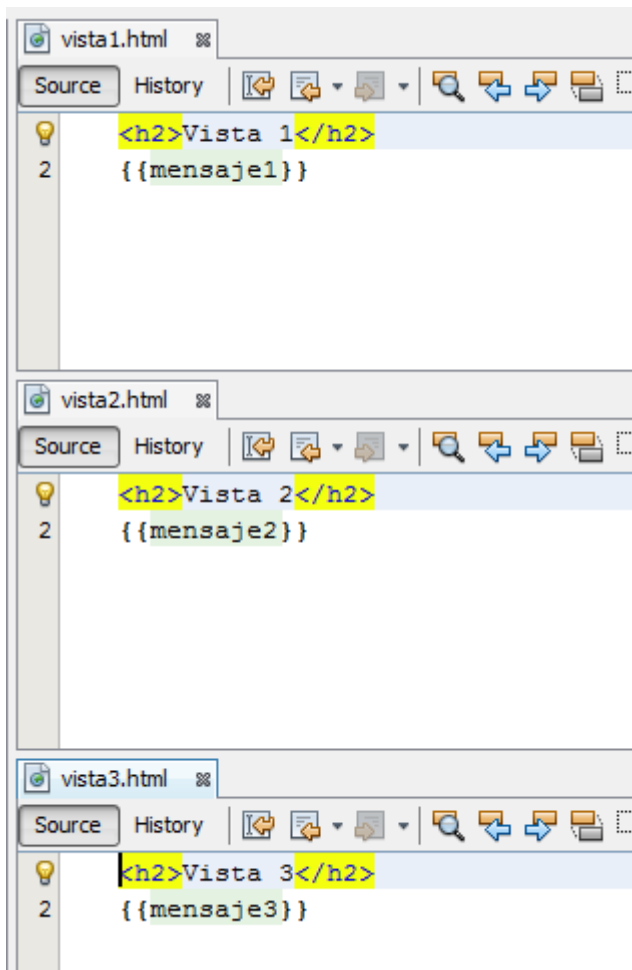

Vista 3

tipo 3

```
index.html
<!doctype html>
<html ng-app="app">
  <head>
    <title>IBM</title>
    <link rel="shortcut icon" href="favicon.ico">
    <script type="text/javascript" src="js/angular-1.5.js"></script>
    <script type="text/javascript" src="js/angular-ui-router.js"></script>
    <script type="text/javascript" src="js/code.js"></script>
  </head>
  <body>
    <div ui-view="box1" style="background: #ECCFE3"></div>
    <div ui-view="box2" style="background: #E5EDD5"></div>
    <div ui-view="box3" style="background: #FCE6CE"></div>
  </body>
</html>

code.js
var app = angular.module("app", ["ui.router"]);

app.config(['$stateProvider', '$urlRouterProvider',
function ($stateProvider, $urlRouterProvider) {
  $urlRouterProvider.otherwise('/');
  $stateProvider
    .state('home', {
      url: '/',
      views: {
        'box1': {
          templateUrl: 'vista1.html',
          controller: function($scope) {
            $scope.mensaje1 = "tipo 1";
          }
        },
        'box2': {
          templateUrl: 'vista2.html',
          controller: function($scope) {
            $scope.mensaje2 = "tipo 2";
          }
        },
        'box3': {
          templateUrl: 'vista3.html',
          controller: function($scope) {
            $scope.mensaje3 = "tipo 3";
          }
        }
      }
    }
  });
}]);
```

The image shows three separate code editor windows, each displaying a different HTML template for an AngularJS view. Each window has a toolbar with icons for source, history, undo, redo, search, and other editing functions. The first window, titled 'vista1.html', shows the code: `<h2>Vista 1</h2>` on line 1 and `{{mensaje1}}` on line 2. The second window, titled 'vista2.html', shows the code: `<h2>Vista 2</h2>` on line 1 and `{{mensaje2}}` on line 2. The third window, titled 'vista3.html', shows the code: `<h2>Vista 3</h2>` on line 1 and `{{mensaje3}}` on line 2. The code is highlighted in yellow.
