

Ejemplo 1

```
var apim = require('apim');
var json_input = apim.getvariable('request.body');

apim.output('application/json');
session.output.write(json_input);
```

Ejemplo 2

```
var apim = require('apim');
var json_input = apim.getvariable('request.body');

var json_output = {
  'correo': json_input.email,
  'country': 10
};

apim.output('application/json');
session.output.write(json_output);
```
