

Obtener valores

```
var num1 = apim.getvariable("request.headers.valor1");
var num2 = apim.getvariable("request.headers.valor2");
```

Validación

```
if( apim.getvariable("request.headers.valor1") == undefined ||
apim.getvariable("request.headers.valor1").trim() == ""){
apim.error("error de parametros");
}
```
