```
var urlopen = require('urlopen');
let options = {
    target: 'https://reqres.in/api/users',
    method: 'POST',
    headers: {},
    contentType: 'application/json',
    timeout: 60,
    data: {"name": "morpheus", "job": "leader" }
};

urlopen.open(options, function(error, response) {
  if (error) {
    // an error occurred during the request sending or response header parsing
    session.output.write("urlopen error: "+JSON.stringify(error));
  } else {
    // get the response status code
    var responseStatusCode = response.statusCode;
    var responseReasonPhrase = response.reasonPhrase;
    console.log("Response status code: " + responseStatusCode);
    console.log("Response reason phrase: " + responseReasonPhrase);
    // reading response data
    response.readAsBuffer(function(error, responseData){
      if (error){
        throw error ;
      } else {
        session.output.write(responseData) ;
        apim.output('application/json');
      }
    });
  }
});
```
