TCP Connection Test

The screenshot shows two panels from the IBM DataPower Gateway 7.5 Troubleshooting Panel. The top panel is titled "Execute Action" and displays the text "Test TCP connectivity to aprendeibm.com port 80?" with "Confirm" and "Close" buttons. The "Confirm" button is highlighted with a red border. The bottom panel is also titled "Execute Action" and displays the text "Error while processing action." followed by a red bullet point: "TCP connection to 'aprendeibm.com port 80' failed (connection refused)". A "Close" button is located below the error message.
