

### DataPower - Troubleshooting - ping

**DataPower - Troubleshooting - [telnet](#)**

The image shows two screenshots of the IBM DataPower Gateway 7.5 Troubleshooting Panel. The top screenshot displays a confirmation dialog titled "Execute Action" with the text "Test TCP connectivity to aprendeibm.com port 80?" and two buttons: "Confirm" (highlighted with a red box) and "Close". The bottom screenshot shows an error message titled "Error while processing action." with a red bullet point: "TCP connection to "aprendeibm.com port 80" failed (connection refused)" and a "Close" button.
