IBM Cloud Pak for Integration is crafted to empower teams to accelerate digital transformation by providing a cohesive toolbox of integration capabilities. The Cloud Pak was born out of the IBM integration technologies that underpin the world economy including tools such as MQ, Integration Bus, API Connect, Aspera, DataPower and Event Streams—all of which now run natively on the Red Hat OpenShift Container Platform through the IBM Cloud Pak for Integration. Learn what's new with the IBM Cloud Pak for Integration, watch a demonstration on how the Pak enables companies to adopt an Agile Integration strategy to empower cross functional teams, and dive into how the Pak will accelerate integration practitioners of all types.
