

Materialize CSS es una librería que nos permite realizar interfaces UX con mucha facilidad, está conformado por 1 .js y 1 .css

About

Getting Started

CSS

Components

Badges

Buttons

Breadcrumbs

Forms

Forms are the standard way to receive user input and are very important because of the inherent use

Input fields

Text fields allow user input. The border should light up when you have a `.input-field` div wrapping your input and label. Textarea form elements.

The `validate` class leverages HTML5 validation and will add Red validation states, just remove the `validate` class from
