

X-editable es una librería que nos permite modificar de manera rápida un texto haciendo uso de librerías de javascript.

Bootstrap (2 or 3)

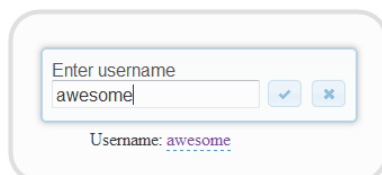

Twitter Bootstrap has awesome [Form markup](#) and [Popover plugin](#) allowing pretty in-place editing. For *date* input it uses [bootstrap-datepicker](#).

[Download BS3 build](#) [BS2 build](#)

jQuery UI (1.9+)

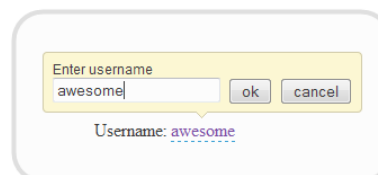

Starting from jQuery UI 1.9 it has [Tooltip plugin](#). In combination with [Button widget](#) it is suitable enough for editable form and popup. You can apply any theme of jQuery UI [Themeroller](#).

[Download jquery-ui build](#)

jQuery (+ poshytip plugin)

The simplest build of X-editable. For *inline mode* you need only jquery. For *popup mode* it uses [Poshytip plugin](#). For *datetime* fields you can use [combodate](#) type based on [moment.js](#).

[Download jquery build](#)
